

1. Open your web browser and navigate to [Maven's official website](https://maven.apache.org/).
2. Click on the **"Download"** link on the Maven homepage.

3. For Windows, click on the **Binary zip archive** link. If you are using a different operating system, select the appropriate binary package for your system.

4. Click on the **apache-maven-3.9.9-bin.zip** button. (for Window)
5. Now check for the executable file in downloads in your system.
6. Now right-click on the file and click on extract here to extract the file.

7. After extracting, you get the extracted folder.
8. Now copy the extracted folder.

9. Paste the copy folder in your windows drive in the Program files folder.

10. Permission Windows appears to paste the folder in program files then click on “Continue”.
11. Open the folder apache maven.

12. After opening the folder then copy the address of the folder in program files.

Example: **C:\Program Files\apache-maven-3.9.9**

13. Add **MAVEN_HOME** System Variable

14. Click on Start Menu and search “**Edit the system environment variables**” and open it.

15. After opening System, Variable New window appears, and click on “**Environment Variables**”

16. Now click on New under user variable.

17. Now you can write "MAVEN_HOME" variable name and then paste the address we copy from program files in the variable value and then click on OK.

18. Now go to the “System variables” Path option and double click on Path or Click on the Edit button.

19. Now click on “New” Button.
20. Copy the path of bin dir from maven installation. Example : “C:\Program Files\apache-maven-3.9.9\bin”
21. Paste as shown below and click Ok OK OK etc.....

22. Maven installs done
23. Verify Maven Installation → Open new “cmd” / command prompt and type “mvn -version”

```
Microsoft Windows [Version 10.0.26100.3194]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Suresh>mvn -version
Apache Maven 3.9.9 (0e85779a9e70f7d015ee5ec7bfcdc97d260186937)
Maven home: C:\Program Files\apache-maven-3.9.9
Java version: 1.8.0_202, vendor: Oracle Corporation, runtime: C:\Program Files\Java\jre1.8.0_202
Default locale: en_IN, platform encoding: Cp1252
OS name: "windows 10", version: "10.0", arch: "amd64", family: "windows"

C:\Users\Suresh>
```

24. If you see above message means, maven installation is done.

Develop Sample Java Application using Mavan

1. Create Sample Standalone Project:

```
mvn archetype:generate -DgroupId=com.example -DartifactId=helloworld -DarchetypeArtifactId=maven-archetype-quickstart -DinteractiveMode=false
```

2. Go to project Directory "helloworld"
3. Compile the code using below command.

```
mvn compile
```

4. Run the code

```
mvn exec:java -Dexec.mainClass="com.example.App"
```

If you see below message, then your program ran/executed successfully.

```
C:\Users\Suresh\OneDrive\Desktop\Academy\Batch\Java Backend - Full Course\12th Feb Full Batch\helloworld>mvn exec:java -Dexec.mainClass="com.example.App"
